

NeXus-Sports

Introducing..
Schedule-Xsport

powered by NeXus-Sports

designed for Hockey

► **Complete Data Management Solutions** ◀

The NeXus Scheduling-Xsport enables ice schedulers to create, maintain and manage games, practices and or other events for the small to large sized hockey leagues. Schedulers can communicate easily team, division, or arena schedules in a calendar or spreadsheet format via email changed by changed event, month or a defined period of time.

When the season begins use the Import Tool to easily bring division games into your season that may be sent to you from in an excel spreadsheet. Copy from one

season to another, divisions, centres, teams – you are in control. Create, modify and manage your season with ease. Check for conflicts by arena, by team or available ice. Find games quickly. Run multiple seasons at one time. Run Ice Availability Reports, Team Calendars, Arena Calendars, Division Reports. Notify other schedulers, refs or teams of change of game times with ease via hot links to email. Emails are auto-filled with old time /new time - no re-keying to minimize errors. Export to spreadsheets, word or pdf formats, create practices and 'other' events and communicate easily to email lists and or addresses.
